

WILSON•HURD®**LP TRUCK PUSHGATE® PANEL**

The panel shown here was designed for use in a LP delivery truck where it monitors the flow and amount of LP gas that is dispensed.

Drivers of these delivery trucks are often wearing gloves while operating the switch - making it vital that each switch have a crisp tactile feel when actuated.

This, in addition to significant reliability and longevity of operation over traditional mechanical switches, led our customer to choose the Duraswitch® PushGate® technology for this project.

Project Details:

- Size: 5.00" x 12.00"
- Twenty-two (22) PushGate® switch keys

LP Truck PushGate® Panel

- Polyester overlay with clear windows
- Colors: Black keys with silver background
- Laser cut backer
